

FLOW 38 WITH IOT

“Smart Flow Measurement
Without Limits”

KEY FEATURES

- **Real time Data Access** - Monitor flow rates and consumption live, anytime, anywhere
- **Remote diagnostics** - save time and service costs with instant system insights and alerts
- **Automatic reporting** - receive scheduled reports and exportable data for easy analysis and documentation
- **Predictive Maintenance** - detect irregularities early and prevent costly breakdowns
- **Wireless communication** - uses Nb-IoT for secure, energy efficient data transfer
- **Easy integration** - compatible with existing systems via cloud
- **Customs notifications** - stay informed with alerts for leaks, flow anomalies or system issues

FLOW 38 WITH IOT

EASY STEP MANUAL

TECHNICAL DATA

PARAMETER	VALUE
Communication Technology	NB-IoT
Modem Module	Quectel BC66 Cat NB1
Supported Bands	B1, B3, B5, B8, B20, B28
Data Transmission Speed	DL up to 25,5 kb/s, UL up to 62,5 kb/s
SIM card	Standardní 2FF slot
Antenna Connector	SMA, 50 Ω
Adjustable Transmission Interval	Yes in minute
Indicators	Power LED (Green), communication (Red)
Operating Temperature	-40 °C up to +85 °C

IoT Module
